

Permissions

Here's the table — select it and copy directly into Google Docs (it should paste in as a formatted table):

Role	View	Add	Update	Delete
Reader	All approved articles and newsletters; their own subscriptions	Their own subscriptions (subscribe to a publisher/journalist)	Not applicable	Their own subscriptions (unsubscribe)
Journalist	Their own articles and newsletters	Their own articles and newsletters	Their own articles and newsletters (editing resets approval status back to "new")	Their own articles and newsletters
Editor	All articles and newsletters	Their own newsletters only (cannot add articles; only journalists can create articles)	Approval status on any article. Publish status only on articles currently unpublished. Full update on their own newsletters	Articles they personally published only. Full delete on their own newsletters
Admin	All publishers	Can add publishers	Not Applicable	Can delete publishers

Authentication

Users will log in with their username and hashed passwords.

Authorisation

Journalists only have authorisation over their own articles and newsletters.

Data Security

- Passwords are hashed.
- There are input validations to prevent SQL injection.
